Alpha Global Equity Fund

GLOSSARY

Annualized Volatility: Measures how dispersed daily fund returns are and annualizes the result using 252 trading days. Higher volatility indicates a wider range of historical returns.

Sharpe Ratio: Measures historical excess return relative to volatility. The calculation uses the risk-free rate selected in the application.

Maximum Drawdown: Measures the largest historical decline from a previous NAV peak during the selected measurement period.

Beta: Measures the sensitivity of fund returns to benchmark returns. A beta of 1 indicates similar historical sensitivity to the benchmark.

Tracking Error: Measures the annualized standard deviation of the difference between fund returns and benchmark returns.

Net Assets of Fund: The latest available assets-under-management value on or before the selected fact-sheet reporting date.

Number of Holdings: The number of portfolio positions in the selected holdings snapshot, excluding cash by default.

SECTOR ALLOCATION (%)

Technology	22.70%
Other	17.50%
Cash	12.30%
Healthcare	12.10%
Financials	11.60%
Industrials	11.30%
Consumer Discretionary	6.80%

COUNTRY ALLOCATION (%)

United States	26.60%
Other	23.00%
Eurozone	12.30%
Switzerland	7.40%
France	6.80%
United Kingdom	6.60%
Japan	6.10%
Spain	5.70%
Taiwan	5.50%

IMPORTANT INFORMATION:

Performance basis: Net of fees (synthetic demo NAV). Benchmark basis: Total return benchmark (synthetic demo).

This document is a synthetic demonstration of an automated investor-relations reporting workflow. The figures are not actual investment results and are not intended as investment advice, a recommendation, an offer, or a solicitation. Production use should rely on administrator-approved NAV and total-return data, approved benchmark series, validated portfolio holdings, and compliance-approved disclosures.

Past performance does not guarantee future results. Investment return and principal value may fluctuate. Risk statistics are sensitive to the selected measurement period, observation frequency, benchmark methodology, and risk-free rate. Holdings and allocations are subject to change. Users should review all generated documents before external distribution.
